## What is it about?

The World Symposium on Sustainable Tourism (WSST 2025) will address the **pressing challenges and opportunities within the rapidly growing tourism industry**. While tourism offers numerous benefits, when poorly managed, it can lead to significant risks, including environmental degradation, resource exploitation, and cultural commodification.

This symposium will **focus on sustainable tourism practices that aim to promote environmental conservation, cultural preservation, and community development alongside economic growth**, demonstrating that these objectives can be achieved in harmony. Key themes will include sustainable tourism management and planning, community and economic development, environmental conservation, and cultural preservation.

### OPPORTUNITY FOR PUBLICATION:

Chapters can be published in a **Springer Nature Book**

## Key topics

WSST will explore a wide range of thematic areas related to sustainable tourism, including but not limited to:

- Sustainable tourism management
- Sustainable tourism governance and policy frameworks.
- Ecotourism, wildlife conservation, and biodiversity preservation.
- Community-based tourism and local economic development.
- Climate change adaptation and resilience in tourism destinations.
- Sustainable tourism marketing and visitor education.
- Cultural heritage conservation and sustainable tourism practices.
- Responsible tourism planning and destination management.
- and much more...

## Interested in Attending?
