

## Declaration of consent for publication of a Master's thesis

**By signing the author declaration on the application to complete a Master's thesis, I agree to be bound by the following agreement:**

1. I hereby grant the Hamburg University of Applied Sciences (HAW Hamburg), represented by the Faculty of Life Sciences, the non-exclusive right to electronically save, convert into other formats (if applicable) and reproduce my Master's thesis, as well as to make it available to the public on a permanent basis on the HAW Hamburg servers and via the Internet.
2. The final thesis document may also be displayed in the Faculty of Life Sciences library and made accessible to interested persons.
3. The thesis summary (form sheet), which is to be submitted separately from the final thesis, may be reproduced in its present form and published electronically.
4. I am aware that, in connection with the publication of my final thesis in the manner specified above, HAW Hamburg is obliged to deliver the thesis to the German National Library and to the Hamburg State and University Library under the German Legal Deposit Libraries Act.
5. The document server is operated by HAW Hamburg. HAW Hamburg reserves the right to subcontract these services to third parties.
6. I am aware that the publication of the thesis, especially on a HAW Hamburg server, may compromise or exclude other publication.
7. I certify that I am the sole owner of any and all copyrights in the Master's thesis and that the publication thereof does not infringe on the copyrights of any third parties or violate any applicable laws. This also applies to illustrations such as photos or graphics contained in the final thesis.
8. I certify that my final thesis does not include any personal data from third parties that is subject to data protection, except where I have obtained express written consent for the publication of such data.
9. I certify that the submitted version of the final thesis is identical to the approved original version. This does not apply to the parts of the publication subject to data protection.
10. As the author, I undertake to indemnify HAW Hamburg from all claims raised by third parties against HAW Hamburg on the grounds of any copyrights or other intellectual property rights held by them.
11. If claims are asserted directly against HAW Hamburg by third parties, I shall immediately provide HAW Hamburg with all the information and evidence required to defend against such claims.
12. HAW Hamburg is entitled to completely or partially block access to the above thesis in the event that there are concrete reasons to believe that the thesis violates any legal provisions or a violation of third-party rights which is not clearly unsubstantiated is asserted.

13. I have been informed that HAW Hamburg is not liable for any misuse of the contents by third parties. I am aware that the registration of intellectual property rights is my sole responsibility.
14. Should I have failed to remove my personal data (e.g. date of the final examination, curriculum vitae) from the final thesis, then I agree with the storage and publication of such data. I have been informed that the bibliographic data and thesis abstract will be published on the Internet via various catalogues, databases and search engines.
15. As the author, I also have the right to make the final thesis available and to distribute it via other channels.
16. At my request, the final thesis can be deleted from the HAW Hamburg servers and removed from the library collection. I am aware that the deletion of the final thesis from the HAW Hamburg servers does not affect the transfer to the German National Library and to the Hamburg State and University Library and that the final thesis will still be available from these libraries.
